Recruiting Team
Lapakgrafi

Dear Sir/Madam,

Firstly, allow me to introduce myself. My name is Muhamad Sidik Nur Rizki and I have been working on various projects in PT.Sharing Vision Indonesia as a Software Engineer. This year is my last year working for an IT consulting company, and I want to switch careers as a UI/UX designer at your company, which I know from Telegram.

I'm sure I have the skills suitable for this position because when I entered semester 3, I was working on my final project to make an application design. I made a digital Pakpol application design. The application is similar to an online motorcycle taxi, only modified. Where the user sends a signal to the police and the police come towards the signal sent.

When I finished working at the previous company, I felt that my passion was not in the field of software engineering. Finally, I tried a new field, which is UI/UX design. I took several courses to deepen this field. I also attended several seminars and workshops related to UI/UX design. I hope that the UI/UX skills that I have are based on the experiences I get to match the work of a UI/UX designer at Lapakgrafi.

related to ui/ux design, I took part in an internship program at SIS (Sumapala Integration Service) as a ui/ux designer. I worked on government projects, and I did it myself because there was no UI/UX besides me. I did user research, and the user needs to change their old site. I worked on the project with the knowledge I had, but I still studied it, especially the basics and hopefully it will This can be taken into account too.

I am interested in working at Lapakgrafi, because i want to grow with this company, especially in the field of UI/UX. I want to work on projects with your team, make a big contribution, and collaborate together.

Hereby I enclose my CV for your review. I look forward to having the opportunity to share more details during the interview. Thank you for your consideration.

Yours Sincerely,

Muhamad Sidik Nur Rizki

Komp Pilarmas Blok M14 No.127 Cimahi Selatan

My name is Muhamad Sidik Nur Rizki. I am a 4th semester student majoring in Informatics Engineering at one university in Bandung. I am a hard worker, happy to learn new things, always aware of something, and communicative. Although my experience, especially in the field of UI/UX, is still very minimal, I'm sure I can develop even better.
