Malang, Indonesia

As a UI/UX Designer, I have a skill set in designing user interfaces that are attractive and user-friendly with a focus on user experience. I have developed the ability to understand user needs and transform them into visually appealing designs. I am highly skilled in using design tools such as Adobe Photoshop, Adobe Illustrator, and Sketch. I also have experience building prototypes using InVision and Figma.

I have a good understanding of modern technologies such as responsive design, UI animation, and mobile design. I have also worked with development teams to ensure my designs are implemented well and according to specifications.

Throughout my career, I have worked on various projects in different industries, including e-commerce, fintech, and mobile applications. I have experience in conducting market research, user testing, and analyzing data to develop better designs.

I am an organized individual and can work independently or in a team. I enjoy communicating with clients and development teams to ensure that every project runs smoothly. I focus on quality and creativity in my designs and continually strive to improve my skills through training and new experiences.
