PROFILE

As a recent graduate, I am a highly motivated individual with 2 years of experience in website development. I have successfully completed various personal and client projects utilizing React.js, Next.js, and Laravel. Seeking a position as a Front-End Developer, I am determined to apply my knowledge and skills to create visually appealing user interfaces and deliver exceptional user experiences. I am eager to join a dynamic development team and contribute to the creation of innovative solutions that drive business success.

EDUCATION

2019 – 2023 **Methodist University**, Bachelor of Informatics Engineering
Medan, Indonesia

PROFESSIONAL EXPERIENCE

Ruangguru, Front End Engineering Bootcamp Student

Participated in Ruangguru Bootcamp for 5 months and successfully completed the program with a GPA of 4.0, and was selected as Top Student and won 1st place during the project finals.

PROJECTS

ToeFl Test Website

- Developed using the Laravel framework, Alpine.js, and Livewire.
- Built responsive, accessible, and dynamic web pages using Tailwindcss
- Implement payment features using Midtrans, ensuring the reliability and security of payment transactions through Midtrans integration.
- Utilizing Alpine.js to provide dynamic interactivity to the user interface and Livewire to process data in real-time.

Ikatan Alumni Website

- Implement features to record alumni, present news about alumni, and organize alumni events.
- Collaborate with relevant teams and parties, including the school owner and Alumni Association board.
- Using Bootstrap to create attractive and responsive displays for various devices.

SKILLS

HTML • CSS • Reactjs • Javascript • Tailwindcss • Laravel • Nextjs
