SUMMARY

I have an interest in the world of computer technology, one of which is programming. I like to learn new things about it, so I'm dedicated to be a reliable programmer. BNSP Certified as a Junior Web Developer. Even though I am a fresh graduate, I have the ability and experience in developing applications through 2 years as web developer with proficiency PHP language.

EXPERIENCE

Universitas Ibnu Sina – Batam
Lecturer Assistant (2021 – Now)

- During my time at university, I helped with the preparation of teaching materials and assisted with lectures and courses.
- Making software for thesis students or schools around Batam, about 20 applications were accomplished.

Kecamatan Batam Kota – Batam(Voluntary Work)
IT Support (October 2022–January 2023)

- Maintaining office computers, repair computer from a virus, set up printers and other peripherals.
- Make a letter management system application in the community empowerment section, an application may include whatsapp bussiness api.

PT. Selaras Mutiarasi – Bandung(Remote)
Fullstack Web Developer (June 2022 – May 2023)

- Building on previous developer work, projects that focus on advertising/networking websites are increasing the number of advertising domains so that they have a wide reach to visitors.
- Manage projects with teams using a variety of tools, including gitlab for version control and cloud hosting for website storage.
- Integrate any API's the one is STRIPE payment gateway, NLP Translation for translate whole page based on visitor country language
- Communicate as well with developer team and project owner.
