Hello, I am Marta Pradana Nugraha Putri. I am very interested in the field of technology. I really enjoy solving problems, and also exploring new things. After graduating from vocational school majoring in computer and network engineering I want to increase my skills in the field of technology by continuing my education at the wearnes education center majoring in informatics engineering.

EDUCATION

Diploma 1	**Wearnes Education Center Madiun**	**2021 – 2022**

EXPERIENCE

IT Support	**Perhutani Forestry Institute**	**May 2022 - June 2022**

- Making sure all computers is usable.
- Making sure all computers is connected on the network.
- Ensuring all applications is usable and runs smoothly.
- Understanding and mastering the basics of computers
- Understanding the working principle of switches, routers and others
- Repairing and preparing a damaged computer in the shortest time

PROJECTS

Point Of Sale	**Feb 2022**

The point of sales application in which there are member data, product data, transaction data, user data and report data processing. So that it can make it easier for cashiers in transacting with customers.

https://github.com/martapra/laravel-pos

Computer Shop	**May 2022**

The computer shop application in which there are a home menu, product and setting. The product display data is obtained from the point of sales / cashier application. The android-based application is to display the goods sold by the store and can transact online.
